

Technology, Media & Telecommunications

Representing leading technology and Internet companies, our multinational IT Practice Group combines in-depth legal expertise with a strong understanding of the market, market practices worldwide and detailed IT and social media knowledge. We are able to guide and advise clients on many aspects of business related to the Internet and technology, aided by our involvement in Internet specific professional associations in Hong Kong and our participation in intellectual property groups in Europe and the United States. Our considerable experience of working in China allows us to advise clients on the PRC's complex regulatory environment, including identifying and clarifying issues, dealing with government officials and arranging permits and licences. Fully conversant with China and international tax law as it affects IT ventures, our team can also advise on tax planning and structuring.

Our experienced media and entertainment team offers clients a wealth of practical advice on all aspects of media law and intellectual property rights.

In addition to intellectual property issues arising from legacy work by artists and brands, our firm supports clients in areas as diverse as fine art auctions, advertising engagement and campaigns, charitable outreach activities, sweepstakes, the liability of Internet intermediaries and anti-infringement actions for Internet IP abuse.
