

## Immigration

Our experienced Immigration team in Hong Kong supports both local and multinational clients with all inbound and outbound immigration and visa matters. Lawyers from our immigration practice are able to advise clients on every aspect of inbound immigration visa policies and procedures, as well as helping clients to apply for various types of residential visa in Hong Kong.

For outbound immigration matters, our membership of Interlaw allows us to provide clients with access to immediate advice and support through a network of member firms in nearly 80 jurisdictions worldwide. We also work closely with reliable and reputable agents to assist our clients in obtaining permanent resident status and/or passports for selected countries.

Our team also offers company formation services, working with our company secretarial department to aid clients in establishing a company in Hong Kong or setting up a branch of a foreign corporation, as well as providing all related legal support. Company formation is often a vital pre-requisite for obtaining entrepreneur visas in Hong Kong. Entrepreneur visas are for investment with residence in Hong Kong (investment can be by way of establishing or joining in a business in Hong Kong) with the purpose of contributing to Hong Kong's economy. We assist our clients in demonstrating these economic benefits to the Hong Kong Immigration Department.

All of our immigration services are tailor-made for clients, ensuring the necessary flexibility to support any kind of onshore or offshore visa application.
